Bowling Green State University, infiNET and Triand, Inc.
Join PESC Membership

February 6, 2006 (Washington DC) ~ The Board of Directors of the Postsecondary Electronic Standards Council (PESC) is very pleased to announce that Bowling Green State University, infiNET and Triand, Inc. have joined the PESC Membership.

“PESC is the only organization I know in higher education where competitors, clients and oversight entities all work together for the development of communication standards that everyone can agree on and use,” states Craig Cornell, Director of Student Financial Aid at Bowling Green State University (BGSU) and Vice Chair of the PESC Board of Directors. “As a campus end-user of many of these products, it is vital for us to remain knowledgeable of any changes. This provides us the opportunity to look into the future, which better allows me to plan and move resources appropriately,” Mr. Cornell adds.

"Becoming a member of PESC allows infiNET to further collaborate with others in the higher education community in developing standards to lower costs, improve service, and attain system interoperability for colleges and universities. We are very excited to join the PESC community and help lead this cause." said David King, President and COO of infiNET.

"Triand is pleased to join PESC in creating a national standard for delivery of technology solutions that serve the entire educational system," Sylvia McMullen, M.Ed., Senior Vice President of Triand, Inc., expressed on joining PESC.

Information about PESC Membership is available at www.PESC.org/Membership/Overview.asp. Questions about PESC Membership can be directed to Jennifer Kim, Membership Services Manager, at 202-263-0296 or at Kim@PESC.org.

About BGSU
Bowling Green State University (BGSU) offers an outstanding educational experience. At BGSU, academic learning is paired with a campus wide commitment to values exploration and prepares graduates to go out into the world as critical thinkers, skilled communicators, and ethical leaders, in all areas of study. This vision uniquely distinguishes
BGSU as a public university with a unified purpose. With more than 200 undergraduate majors and programs, BGSU's learning community provides high-quality faculty members who care about their students, an appreciation for diversity, and the latest in information technology. Of the 20,300 students enrolled at BGSU, 17,300 are undergraduate students, 10 percent come from outside the state of Ohio (including more than 540 from other countries), and more than 1,680 are African American, Native American, Hispanic, or Asian American.

About infINET
infINET was founded in 1997 on the philosophy that there's a better way to deliver innovative business services to complex universities and college systems. infINET has made higher education their primary business. infINET continually collaborates with a large number of the country's colleges and universities to guarantee a 100% customer-centric view of the world—and their place in it. infINET's automated billing, payment processing, and commerce solutions support real business needs. Finally, infINET knows that constant communication is what makes a good relationship even better. infINET's philosophy is based on four principles that are used to guide daily actions, decisions, and interactions with its clients: preparation, execution, perseverance, and integrity.

About Triand, Inc.
Our goal is to provide educators with the tools they need when they need them at a cost they can afford. The philosophy of listening and responding directly to educator needs with just in time and just enough technology makes it all possible. Welcome to the Triand family where education and collaboration matter and you make the difference.

About PESC
Established in 1997 and located in Washington, D.C., the Postsecondary Electronic Standards Council (PESC) is a non-profit, community-based, umbrella association of colleges and universities; professional and commercial organizations; data, software and service providers; and state and federal government agencies. PESC’s mission is to lead the establishment and adoption of data exchange standards in education. The goals of the mission are to enable the improvement of institutional performance and foster collaboration across educational communities in order to lower costs, improve service, and attain system interoperability.
