JIM WAGER
VICE PRESIDENT & CIO, SCRIP-SAFE
JWAGER@SCRIP-SAFE.COM
With a majority of states and provinces now supporting PESC Approved Transcript standards, a number of leading service providers are correspondingly improving their transcript processing services.

Through adoption of standards and guiding principles originating from PESC's Common Data Services Task Force, schools, students, states and all users will be able to expect ‘uniform’ service related to data exchange of academic transcripts.

This session will present a panel of providers who will highlight these improved services and how standards and interoperability help make services ‘consistent’ & efficient.
PESC MISSION & VISION

Through open and transparent community participation, PESC enables cost-effective connectivity between data systems

- to accelerate performance & service
- to simplify data access & research
- to improve data quality along the education lifecycle.

PESC envisions national and international interoperability within the Education domain, supported by a trustworthy, inter-connected network called EdUnify built by and between communities of interest in which data flows seamlessly from one system to another and throughout the entire eco-system when and where needed without compatibility barriers but in a safe, secure, reliable, and efficient manner.

While PESC promotes the implementation and usage of data exchange standards, PESC does not set (create or establish) policies related to privacy and security. Organizations and entities using PESC standards and services should ensure they comply with FERPA and all local, state, federal and international rules on privacy and security as applicable.
Maintain Data Integrity/Quality as Data is Exchanged/Processed
