Rome Student Systems and Standards Group (RS3G)

RS3G (Rome Student Systems and Standards Group) is a self-established group of software implementers and stakeholders in the European Higher Education domain which is focused on contributing to the definition and adoption of electronic standards for the exchange of student data.

Background

There is growing internationalisation of higher education in Europe that will benefit from standards for how data is structured. A group of software providers organised an initial workshop in Rome in November 2007 to help to promote specifications development and adoption. The RS3G builds on the Rome workshop.

RS3G Member Institutions

Academy One Inc., Westchester PA
Digitary, Dublin
EAIE, Amsterdam
ELOT - Standardization Organization
Gartner Sverige AB, Solna
Georgetown University, Washington D.C.
HIS Hochschul-Informations-System GmbH, Hannover
Hochschule Harz, Wernigerode
Hypatia AS, Kråkerøy
JISC – CETIS, York
KION, Bologna
Ladokkonsortiet, Stockholm
Manchester Metropolitan University, Manchester
National Europass Center Italy
Olivedon Ltd., Tetbury, Glos
Oracle Higher Education EMEA, Heverlee
Politechnika Lodzka, Łódź
SunGard Higher Education, Trowbridge
TRIBAL, Hessle
Umeå Universitet, Umeå
unisolution GmbH, Stuttgart
Universidad de Málaga, Málaga
Universität Erlangen / Nürnberg
Universitetet i Oslo, Oslo
Universität Stuttgart, Stuttgart

Contact
QS unisolution was founded in 2001 by Manuel Dietz and Stéphane Velay in the TU Darmstadt and since then specialises in the development of high quality and future-oriented software solutions and consulting services for the internationalisation of higher education institutions. In 2009 unisolution and the software business of QS formed "QS unisolution", a company with offices in Stuttgart and London and part of the QS group with offices in London, Paris, Singapore and Alicante.

Our spectrum ranges from software for international relations management in universities to IT supported application and admission procedures through to solutions for standardised data transfer and communication processes between universities worldwide and the development of IT procedures for implementing the Bologna process.

More than 1,000 universities in more than 50 countries worldwide have chosen our software and services for organising and controlling their international activities.
