On today’s call were

Sebastian Baba, Systems Analyst, Ontario College Application Service (OCAS)

Bob Hewett, Principal Software Engineer, Data Solutions, Pearson, and Co-Chair of ERUG

Tom Stewart, Retired College Registrar from Miami Dade College (FL) and Member of the AACRAO SPEEDE Committee

Romy Teh, VP, Program Management & Client Services, Xap Corporation

Bob started today’s call at 3 minutes after the hour.

**Document Type Code:** This simple data element exists in all of the PESC Schemas, located in the TransmissionData complex data element. Sebastian requested that a new enumerated value of “Cancel” be added to the current existing list of enumerated values. This was approved by the group and Tom will submit a change request to the PESC Change Control Board (CCB).

Since Sebastian is primarily interested in using the new value in the PESC XML Request for a Student Transcript schema, Tom will ask the CCB for a new version (Version 1.2.0) of that schema so it will point to the latest version of Core Main.

In addition, Tom will also ask for a new version (Version 1.2.0) of the PESC XML Response to a Request for a Student Transcript schema.

Hopefully, these updated schemas will be included in the next release of the PESC standards.

**Review of ERUG session at the Las Vegas PESC Data Summit:** Bob gave a brief summary of the ERUG session in Las Vegas.
Inquiry from James Madison University: This was a concern about the date the information was created that is contained in the EDI TS130 student transcript. There are three dates that are transmitted in the EDI TS130 transcript. There appears to be consensus that the date when the original transcript was created by the sending institution should be contained in the BGN03 data element. If this transcript is held by a vendor or other agency and later retransmitted, then this date (BGN03) should not be modified. If it is retransmitted by a vendor or other agency, then a new date of retransmission can (and should) be used in the GS04 and the ISA09 data elements in the wrapper.

Today’s call ended at 25 minutes after the hour.

Next ERUG Conference Call is Tuesday, May 22, 2012 at noon Eastern (11 am Central, 10 am Mountain, and 9 am Pacific) Daylight Saving Time. Call 888.205.5513 and use participant code 952016#.
